To Whom It May Concern,

I am Dr. Etienne Callebout, a recognized alternative cancer specialist in the United Kingdom. Trained as a medical doctor, I have also qualified in acupuncture, homeopathy, naturopathy, cranio-sacral therapy, and other natural approaches, enabling me to provide my patients with the most comprehensive and supportive care possible during their healing journey.

I integrate naturopathic medicine alongside conventional treatments, always searching for innovative and effective herbal solutions. In my practice, I have found several supplements from CLE Holistic Health to be remarkably effective:

CLE Naavudi – helps minimize the symptoms of diabetes.

CLE Alistrol – reduces high blood pressure, with a proven 92% efficacy rate.

CLE Mood Effex – highly effective in supporting the treatment of depression and anxiety.

CLE Trace Mineral Drops – a unique blend of minerals, trace minerals, trace elements, and over 30 organic acids, sourced from rare prehistoric composted plant matter. These trace minerals are extremely small in size, enabling them to penetrate cell membranes and deliver nutrients directly into cells—far more effectively than synthetic or conventional mineral supplements.

Because CLE Holistic Health owns the exclusive shale/mine from which these minerals are sourced, their potency and purity are unmatched. Over the years, this liquid trace mineral complex has demonstrated outstanding results for a wide range of health conditions.

Since incorporating these professional-grade, evidence-based, and clinically proven supplements into my practice, both my patients and I have seen excellent health outcomes. Whether you are managing an existing condition or aiming to prevent disease, I strongly recommend trying these products.

I truly believe CLE Holistic Health offers some of the finest herbal remedies available in the world today.

Sincerely,
Dr. Etienne Callebout, M.D.
